SUMMARY

MSc Business Analytics and Management Science graduate with experience in data-driven performance analysis, KPI tracking, and optimisation across ESG, maritime analytics, and financial modelling projects. Skilled in Python and Power BI to generate actionable insights and support decision-making.

SKILLS

Technical Tools: Python, Power BI, Excel, Word, PowerPoint

Analytics & Modelling: Data Analysis, Forecasting, Optimisation, Machine Learning, Risk Analysis

Business & Marketing: KPI Tracking, Campaign Analysis, Customer Insights, Market Research, Performance Analysis

EXPERIENCE

Action Hampshire

Jun 2025 - Nov 2025

ESG & Sustainability Intern

United Kingdom

- Analysed organisational and impact data to improve reporting accuracy by 25%, enabling more effective performance tracking and decision-making.
- Built Power BI dashboards to monitor KPIs and organisational performance, improving visibility and stakeholder insights by 20%.
- Consolidated cost and policy data, increasing transparency by 30% and supporting data-driven strategic planning.
- Translated complex data into actionable insights for stakeholders.

Roke Manor Research

May 2025 - Sept 2025

Maritime Data Analytics Intern

United Kingdom

- Developed Python-based analytics pipelines to identify behavioural patterns and anomalies in large datasets.
- Automated data processing and modelling workflows, reducing analysis time by 40%.
- Improved model performance and reduced false positives by 30% through validation and optimisation techniques.
- Aligned analytical outputs with KPI tracking frameworks and stakeholder reporting requirements.

EDUCATION

University of Southampton

Sept 2024 - Sept 2025

MSc Business Analytics and Management Science

United Kingdom

- Grade: Distinction (Dean's List - 74%)
- Modules: Optimisation and Decision Modelling, Financial Portfolio Theory, Risk Management
- Dissertation: Anomaly Detection in the Maritime Domain using AIS and Multi-Objective Optimisation

TKM College of Engineering

Sept 2018 - Jun 2022

B.Tech Electrical and Electronics Engineering

India

- Modules: Industrial Psychology, Business Economics, Probability and Numerical Methods
- Dissertation: Fourier Ptychography Microscopy for Cancer Detection

PROJECTS

Customer Sentiment & Engagement Analytics: Analysed 10,000+ customer reviews using NLP to generate customer insights and improve engagement strategies. (BERT, Transformers)

Store Sales & Returns Analytics: Designed Power BI dashboards analysing customer behaviour, sales, and return trends, reducing losses by 12%. (Power BI)

Cruise Revenue Optimisation & Demand Forecasting: Built forecasting and optimisation models to support pricing and demand strategies, improving revenue by 15%. (Python, Optimisation)

Financial Portfolio Optimisation: Applied data-driven modelling to balance risk and return and support strategic investment decisions. (Python)

ACHIEVEMENTS

CORMSIS Excellence Award: Sponsored by Boeing for outstanding MSc dissertation research.

1st Place - Innovation Challenge: Recognised for an asset decommissioning consultancy project.
